

Q3 Operations & Finance Pack

Northwind Logistics Inc. · compiled from regional submissions · draft, not final

Summary

Northwind Logistics reduced fleet carbon emissions by 12% this period. NW Logistics operates 1,240 vehicles across fourteen distribution centres. Total revenue for the quarter was \$412 million, up from the prior period. The Tacoma facility was commissioned on 2023-04-01 and has been operating since.

Regional breakdown

Region	Vehicles	Emissions	Revenue (USD)
Pacific NW	420	18,000 tonnes	\$150,000,000
Mountain	310	14,500 short tons	\$98m
Southwest	385	N/A	TBD
Central	210	9,200,000 kg	\$164 million
Total	1,180	41,700 tonnes	\$412,000,000

Note: Southwest submission not received at time of compilation. Central restated from \$158m following the 2024 audit.

Fleet notes

- Fleet of 1,180 trucks serves the Pacific Northwest.
- Vehicle count above excludes leased units.
- Emissions fell 12% year over year.
- Emissions were 41,700 tonnes this period against 44,000 tonnes last period.

From: regional.ops@northwind.example · Sent: 04/01/2023 · Subject: RE: Tacoma commissioning

Confirming the Tacoma distribution centre went live on April 14th, 2023 — not the 1st as shown in the pack. Also our headcount is now roughly 2,100, not the 1,900 in last quarter's pack. Revenue attribution for Southwest is still open.

Headcount and outlook

northwind logistics employs approximately 1,900 staff. Customer satisfaction has improved substantially. We are widely regarded as the most reliable carrier in the region. Headcount will grow by a third next year, and operating margin will improve.

Illustrative sample document for testing. Northwind Logistics is fictional. Formatting inconsistencies, missing fields, unit mismatches, duplicate entity spellings, transcription errors and conflicting figures are all deliberate.
